(Due to the July 2017 forced "receivership" of our international licensee, BOWENS International UK, not all WAFERs are presently in production.

We have relaunched a limited USA production with Colorado fabrication and Connecticut sailcloths and will update this list as we move forward.)

Warranty- Our products are sold with a satisfaction guarantee. If otherwise, please return for repair, replacement or refund. No other liability is expressed or implied. Prices and specifications are subject to change and improvement. Possession of this pricelist does not constitute an offer to sell.

Return Policy- All returned products should be accompanied by a copy of the original invoice. Please specify reason for return and expected action desired. No restocking charge for resalable product.

Patents and Intellectual "Property"- Wafer US Pat. Nos. US4,669,031A [1981-2004] and US5,023,756A [1986-2009] Other patents applied for. We believe imagemakers, due to their own original creative efforts, will lead the concern for protection of intellectual property, and after some small study, will patronize our original designs, rather than the myriad of clones that follow us.

Product Numbers- Humans need but a single alphanumeric descriptor, so we offer no additional product numbers to assist your computers. Dyslexia rules. Just tell us what you would like.

"Video" Lightbanks- We are working on a simple flat retrofit fixture for use with our longtime ring design - coming soon [2022] - ask us for further info and images.

WAFER LightBanks (Needs a Plume Wafer Ring - choices of ring diameter and hole depth/width - use rings design for your softbox)
